Software Engineer

[Wheelstreet](#), [Privy](#), [TechMahindra](#)

Dec 2016 to Oct 2018

- Wheelstreet - Worked as Android Engineer revamping their whole app for performance and maintainability. Wheelstreet YCS17 is a bike rental app that is now defunct.
- Privy - A hyperlocal shopping app that displays outfits from local boutiques - which is now defunct.
- TechMahindra - A largescale service based MNC where I was trained on Oracle and worked on PHP

"Sharukh is a very hard-working professional with a zest for learning new things. He has a penchant for researching to look for the best approach to any problem which is a big value-add in a team. We've worked together on an Android project but I'm confident that he'll pick up other technologies equally well. I quite enjoyed working with him and will gladly welcome him back in my team in future projects."

Ujjwal Ankur, CEO - Tickertape

"When I started working with Sharukh, our primary goal was to rearchitect our ever-growing code base of customer-facing app. He took the whole responsibility and delivered a highly scalable, maintainable code. With his idealist mindset and a knack for attention to detail, it felt like a breeze to achieve perfectionism."

JD Pawar, Project Manager - AJIO
